5% of GDP

Problem Statement

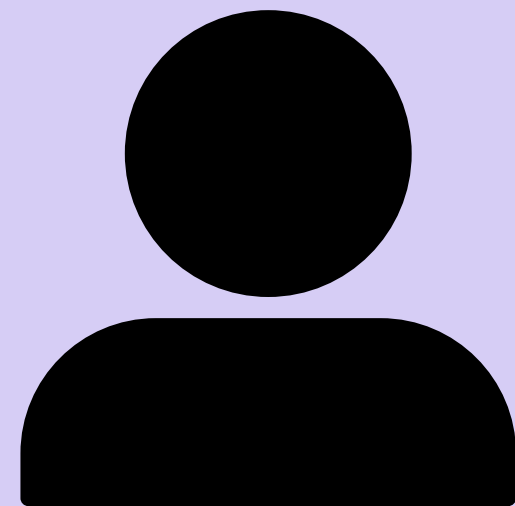

Designing a system which credits extra spent by customers back into their accounts, as rounded off figure.

Customers who make a debit card transaction have that transaction rounded up to the nearest pound and that 'extra pound' is credited to an instant access savings account.

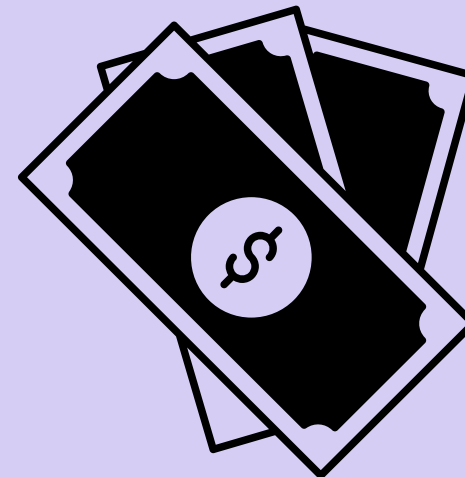

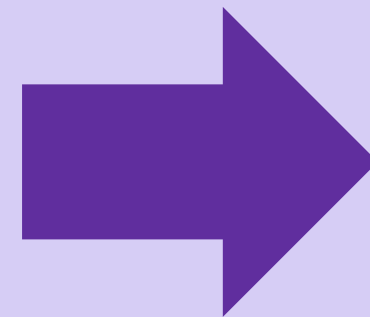

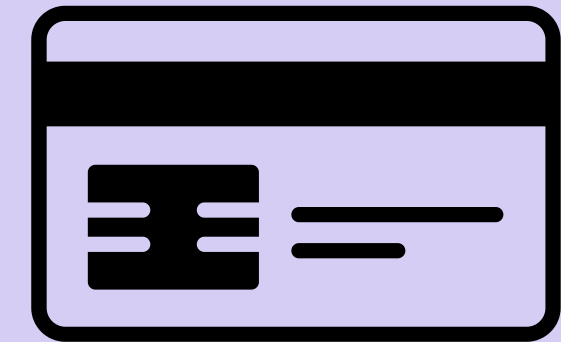

Problem Statement

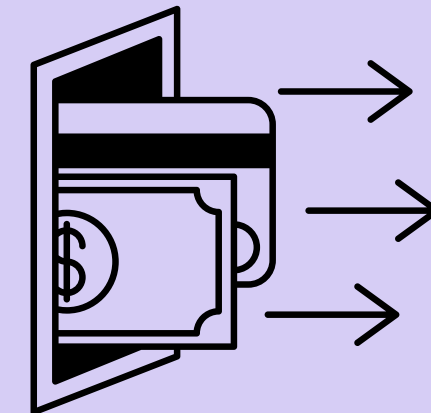

Rs 147

Rs 150

Rs 147

Rs 3

Credit extra spent by customers back into their accounts, as rounded off figure
